AVATR 12

THE FUTURISTIC LUXURY GRAN COUPE

GT

Refined Modern Presence

Sculpted proportions & illuminated signatures define a design language that feels quietly progressive—elegance with purpose.

Sculpted for the GT

The GT Sport Package sharpens every line with a distinctive body kit, a sportier stance, and four sensor-activated electric doors—giving AVATR 12 GT a presence all its own, while the full-width rear light signature carries the family DNA.

Smart Console with 50W Wireless Charging

A minimalist console pairs 50W wireless charging with intuitive touch controls—placing every essential elegantly within reach.

Personalized Drive Modes

Choose between Comfort, Eco, Sport, or Individual—throttle response, steering feel, and cabin ambiance adapt to you, not the other way around.

Rear Comfort, Uncompromised

Heated, ventilated, & massaging rear seats with 4/2/4 split folding and manual full blackout sunshades—engineering the back row to feel like the best seat in the house.

Nappa Leather Rear Seats

Antibacterial Nappa leather with precision perforation delivers refined craftsmanship you can feel the moment you take your seat.

THE FUTURE, ENGINEERED

INTELLIGENT TECHNOLOGY.
UNCOMPROMISED PERFORMANCE.
EFFORTLESS SOPHISTICATION.

Meridian™ Premium Sound System

25 precision-tuned speakers in a 7.1.4 surround configuration fill the cabin with studio-grade clarity—every journey, scored like a live performance.

Smart-Tinted Panoramic Sky Window*

An electrochromic smart-dimming panoramic roof adjusts its opacity at the touch of a button—framing the sky exactly the way you want it.

*Available on AVATR 12 GT. Sporty Blue interior shown.

35.4-inch Integrated Panoramic Screen

A seamless panoramic display stretches across the dashboard, keeping information, entertainment, & controls elegantly within view—for both driver and passenger.

Rear Central Armrest Touchscreen

A dedicated 6.6-inch multi-function touchscreen built into the rear armrest puts climate, media, and seat controls at your passengers' fingertips—first-class command from the back row.

Adaptive Cruise with Automatic Lane Change

IACC (Integrated Adaptive Cruise Control) intelligently manages speed, following distance, and automatic lane changes with quiet precision—making long journeys lighter and more effortless.

Safety Features

Sudden Object Detection and Avoidance

In complex traffic, when a vehicle, pedestrian, or non-motorized road user suddenly enters your path, AVATR 12's AEB (Autonomous Emergency Braking) initiates emergency braking to prevent a collision — keeping you and everyone around you protected.

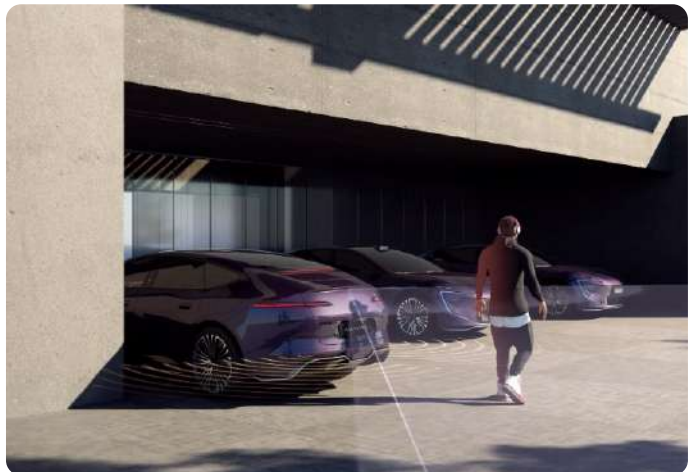

Predictive Braking

AVATR 12's adaptive AEB reads the road ahead. On highways and across varying surface conditions, it anticipates changes in grip and times the braking action precisely — delivering a smooth, controlled stop instead of an abrupt one.

Highway Avoidance

At highway speeds, AVATR 12 stays composed. The system responds decisively to sudden hazards — a vehicle braking hard ahead, road obstacles, animals or pedestrians crossing, irregular debris, or construction zones — applying effective braking when it matters most.

AEB - Autonomous Emergency Braking (Front & Rear)

AVATR 12 protects against sudden, unintended movement. If the system detects an imminent collision — whether from a misjudged pedal input, an obstacle ahead, or a hazard behind while reversing — it intervenes with emergency braking to reduce impact or avoid the collision entirely.
